To Our Friends and Customers

IN presenting our new Price List, which cancels all previous quotations, we take occasion to greet our friends and customers, thanking them for past patronage and assuring them, as well as all new customers, that no effort will be spared to secure their satisfaction by executing all orders in the best possible manner.

WHY YOU SHOULD PLANT TREES—Because a new era of development is taking place in our great Province, the climate of which not only cannot be excelled, but is acknowledged to be superior for the production of all horticultural and farm products and particularly for “home-making” than any other part of the Dominion. The demand for all kinds of garden and farm produce is far ahead of the supply and prices for all fruit properly grown and well packed are all that can be desired from the growers’ point of view, and they are steadily rising yet!

Nor do we want to underestimate the increased value and more so the comfort of contentment easily to be created by the judicious use of Ornamental Trees and Shrubs, and the variety of these is almost unlimited under our favourable climate for the use in the grounds surrounding our homesteads. Nothing will appeal more—for the costliest mansion alike to the humblest dwelling—than a well-kept garden, and a comparatively small outlay for well-grown trees and shrubs will form in a short time a most valuable asset to your properties.

OUR STOCK, THE LARGEST IN THE PROVINCE, embraces the most varied and most carefully selected assortments of hardy Nursery stock in Canada. Many of the leading varieties of both Fruit and Ornamental trees can be supplied in thousand lots of the different sizes, as you can convince yourself if you will only please come to the Nurseries.

All stock sent out is **Strictly First-Class** quality and the **prices are as moderate** as can be quoted for reliable, well developed stock.

SPECIAL OFFER—As a special inducement to our customers we will prepay freight, within a radius of 300 miles, on all orders above \$10, if cash in full, is remitted, prior to shipment of goods.

Packing cases and bales are charged for at cost unless cash is remitted for goods prior to shipping—when packing also will be free.

On all Ornamental Stock we will allow a special cash discount of 5 per cent.

REMITTANCES should be made by draft on Victoria, or by express money order or postal money order. **On personal outside cheques exchange must be added.**

FIVE TREES OR PLANTS OF ONE GRADE AND ONE VARIETY at 10 rate. Fifty at 100 rate. Less than five trees of one sort and grade are supplied at price quoted for single trees, less than 50 at 10 rate.

Claims for shortage or errors must be made within six days after receipt of goods, otherwise they will receive no attention.

WE GUARANTEE STOCK TRUE TO NAME and use utmost care to avoid mistakes, but should any stock prove untrue to label, it is mutually understood and agreed between purchaser and ourselves that we shall in no case be liable for an amount greater than the original cost of the stock that proves untrue to label.

In ordering please give explicit directions as to route, manner of shipment, etc., as it is distinctly understood that our responsibility ceases when the goods are delivered to the transportation company in good order.

To insure the complete filling of orders it is most important that arrangements, for the sorts and varieties wanted, should be made early in the season, especially for Spring shipment. The careful planter makes his plans in good time and has the varieties wanted reserved by the nurserymen till ready for planting. Moreover, orders are filled strictly in rotation in which they come to hand, hence we cannot, except for extraordinary reasons, delay orders received first, for those coming late in the season and requiring attention at once.

THE NURSERIES ARE OPEN DAILY except **Sundays**, to all who are interested in horticulture, and inspection is cordially invited.

The Layritz Nurseries are situated three miles from Victoria on Junction of Carey Road and Wilkinson Road and can best be reached by Motor Stage leaving 611 Johnson Street every hour, or by the B.C.E.R., from Wilkinson Station, about ten minutes walk from Nursery.

We thank our many customers for their past patronage and hope to merit a continuance of their favors in the future.

Faithfully yours,

LAYRITZ NURSERIES,

R. LAYRITZ, Proprietor.

Fruit Department

Our Fruit Trees are all strictly first-class "budded stock" which means in case of yearlings, one year growth on three year old roots.

APPLES

Summer Apples

Duchess of Oldenburg	✓ Red Astrachan
Red June	✓ Yellow Transparent
Liveland Raspberry	

Fall Apples

Alexander	✓ McMahon White
Chas Ross	✓ Peasgood Nonsuch

Special Prices for large lots on application.

Ornamental Department

We have now many fine large specimens of both Shade Trees and Evergreens, repeatedly transplanted and fit to give satisfaction and immediate effect in landscape planting. Prices for these will be given on application, but a visit to the Nurseries by parties interested and personal selection is most desirable.

N.B.—Prices on ornamental stock f.o.b. Victoria.

HARDY AZALIA

Azalias and Rhododendrons are the most charming and showy of hardy flowering ornamental shrubs of the day. The climate of B. C. with early and long lasting Spring weather, assures magnificent display of their gay flowers.

MOLLIS , Orange red	-	-	-	1.00 and up
ANTHONY KOSTER , Large flower, bright orange	-	-	-	1.50 and up
UNIQUE , Bright golden orange, new	-	-	-	2.00 and up
PONTICA , Yellow, fragrant	-	-	-	1.00 and up
PONTICA HYBRIDS , dbl. flg, pink & red	-	-	-	1.50 and up
OCCIDENTALIS , White, fragrant	-	-	-	1.50 and up
HINODE GIRI , Crimson, this is a new hardy evergreen Azalia, highly recommended	-	-	-	1.50 and up

BROAD-LEAVED EVERGREENS

In this section we group all "broad-leaved" Evergreens other than Conifers. In transplanting, these two groups alike, need a little extra care because all the leaves have to be supported. However, by repeated transplanting in our nursery they have formed a close ball of fibrous roots and when shipped the balls are tightly wrapped up in canvas. For best results these trees should be planted without removing this canvas, only cut open the string which is holding it together after the trees have been set firmly in position and the new roots soon work their way through the decaying canvas.

RHODODENDRUM

New Sorts

PINK PEARL, a decided improvement; flowers very large, of a bright glossy pink. This is by far the very best Rhododendron.

WHITE PEARL, very similar in form and size to Pink Pearl, but almost white in color, particularly when forced. Outdoors it is fleshy pink when open, turning fleshy white as it develops.

STRATEGIST, delicate pink, large truss.

Strong specimens, with many flowers, from \$3.00 and up.

GENERAL

The following are the best of bright and attractive colors of the older varieties:—

Blandianum, rosy crimson.

Boule de Neige, white.

Chevalier Felix de Sauvage, fine red, dark spots.

Cunninghami, blush white, early.

Fastuosum flore pleno, double lavender.

Garibaldi, firey red.

Gomer Waterer, blush, fine.

Kate Waterer, light red.

Madame Maison, white, yellow centre.

Michael Waterer, bright red.

Monsieur Thiers, brilliant rose.

Lady Clermont, rosy scarlet.

Prince Camille de Rohan, rosy, crimson centre.

Mrs. R. S. Holford, salmon crimson.

Strong plants, to flower immediately, with from 4 to 30 flower buds, \$2.00 to \$5.00 each.

CONIFEROUS EVERGREENS

This division embraces really the most beautiful evergreen trees suitable for our climate. When planted as specimens most of them require no pruning, in fact their natural and picturesque beauty would be impaired by it. When dug for shipping all these trees are balled and the burlap must not be removed when planting.

ROSES

Our stock of this most popular of all ornamental plants embraces all the leading varieties of the day, including the most valuable novelties of both American and European origin. At the same time we have discarded anything which has been surpassed by improved sorts, or did not come up to the standard in regard to robust, healthy habit and hardiness, and freedom of bloom. All plants sent out are grown in the open field, and with ordinary care they will give a full crop of flowers the first season after planting. Fall planting is most satisfactory, particularly on the Coast where Roses often begin to grow again shortly after New Year.

NEWEST VARIETIES

\$1.50 Each; Ten of a Variety, \$10.00;

Ten Assorted, \$12.00

- Beaute de Lyon**—Brilliant coral red.
- Chrissie MacKeller**—Veined carmine.
- Clarisse Goodacre**—Pure ivory white.
- Cl. Hoosier Beauty**—Very best of red climbers.
- Cl. Sunburst**—Rich yellow, shaded coppery orange
- Columbia**—Peach Pink, very fragrant.
- Ecarlate**—Brilliant scarlet red.
- Grand Duchess Marie Antoinette**—Deep yellow.
- Gladys Holland**—Orange yellow.
- Helen Armacost**—Deep yellow.
- Hoosier Beauty**—Glowing crimson-scarlet.
- Lady Alice Stanley**—Clear Rose; reverse silvery.
- Lady Pierrie**—Deep coppery reddish salmon.
- Mabel Drew**—Intense canary yellow.
- Mrs. David McKee**—Creamy yellow.
- Mme. Collett Martinet**—Old rose and orange.
- Mme. Edouard Herriot**—Superb coral red.
- Mrs. A. R. Waddell**—Apricot, coppery salmon.
- Miss Dora Van Tetz**—Deep glowing crimson.
- Old Glory**—Yellow Mme. Herriot.
- Paul's Scarlet**—Deep brilliant crimson, the very best hardy red climber.
- Red Letter Day**—Satiny-crimson-scarlet.
- W. C. Gaunt**—Vermillion crimson maroon.
- Wedding Bells, Climber**—White.

Veilchen Blau—Blue; the long thought for Blue Rose in reality! Climber.
White Dor. Perkins—Climber.
White Moss.
White Maman Cochet, T.—Creamy white.
White Rambler—White, blush centre.
Wm. Allen Richardson, Climber, T.—Orange yellow.

STANDARD ROSES

Our Standard Roses are budded on Nursery-grown Rosa Canina seedling stems. They are young thrifty stock, exceedingly well rooted, full of vigor and not only certain to grow, but they will last and continue to bring full crops of flowers for many years to come. They are a wonderful improvement over the native briar stocks from the roadsides used formerly, which invariably had poor roots and consequently were short-lived. Besides some of the most desirable older sorts, we have now quite a number of the newest varieties in standard form and a full list of assortment will be given on application.

GENERAL ASSORTMENT

\$1.50 Each; Ten for \$12.50; Ten of a Variety, \$11.50.

Capt. Hayward—Bright red.
Gen. McArthur—Scarlet.
Gruss an Teplitz—Scarlet crimson.
La France—Silvery Pink
Mme. Car. Testout—Silvery-rose.
Marchal B. Wilder—Deep, rich, glowing red.
Richmond—Pure, rich scarlet.

New Sorts**New Sorts, \$2.00 Each; Ten for \$15.00**

Edu Meyer—Rosy pink.
Gen. Sup. A. Jansson—Glowing deep carmine red.
Duchess of Wellington—Saffron yellow.
Killarney—Red.
King George V.—Fiery crimson.
Laurent Carle—Deep rosy carmine.
Mme. Jules Grolez—Bright China red.
Mrs. Memyss Quinn—Chrome Yellow.
Mme. Ed. Herriott—Coral red.
Mrs. John Tait—Salmon pink.
Ophelia—Salmon flesh.
Queen Carola—Dark red.
Sunburst—Orange yellow.
Willowmere—Coral red, suffused carmine.
Winnie Davis—Salmon Pink.

STANDARD WEEPING ROSES

Specimen Roses on stems 6 to 7 feet high
\$2.00 Each and Up.

American Pillar.
Crimson Rambler—Crimson.
Dorothy Perkins—White.
Gold Finch—Yellow.
Gruss on Teplitz—Scarlet crimson.
Tausendchon—Pink.
Veilcher Blau—Blue.
White Dorothy Perkins—White.

If you want your Roses to become fine strong plants, and of course you do, then see that your ground is worked to a depth of at least eighteen inches, enriched with cow manure for preference. Plant deep enough so that not only the roots and stems, but also about three inches of the branches are below the surface of the ground and by this means you not only lesson the danger of your roses being winter-killed, but they will for many years come with young wood from below the ground.

Fall planting is most satisfactory, particularly on the Coast, where Roses often begin to grow again shortly after the New Year.

Herbaceous Plants

The following embrace the very best selection of this desirable class of plants.

A Few Suggestions for Planting and Pruning

HOW TO HANDLE NURSERY STOCK

On the receipt of the trees, open a ditch in loose, damp soil, unpack the trees, being careful to shake out all packing material, put in the trench side by side and cover the roots with fine earth, being careful that it is well filtered among the roots to keep them moist. Never heel in in bundles.

If the trees are delayed in transit, thereby becoming dry (the bark showing signs of shriveling) immerse the trees in a tank over night, and the following day bury root and top completely in damp soil for a few days until they become normal, when they may be planted out. Should trees be frozen in transit, place the package in a cellar or some other place free from frost, but not heated, until thawed out, when they can be unpacked and heeled in as above directed. Trees treated in this manner will not be injured by having been frozen. Before planting be sure to examine the trees carefully and cut away to a smooth surface all lacerated and broken roots with a sharp knife.

PLANTING

The holes should be dug at least eight inches to a foot larger in every direction than required by the roots when spread out in their normal position. The top soil should be broken down from the edge, and raised to a cone in the centre of the hole to set the trees on, and the roots then brought to their natural position. While one man is holding the tree, let the other shovel in the top soil, which should be made quite fine, carefully between the roots until covered, then tramp firmly as the filling up progresses; when nearly all filled in, place two inches of fine, loose soil on the top.

The tree when planted may, in light soil, stand from two to three inches deeper than it stood in the Nursery, but in heavy clay, or wet ground, it is advisable to have it stand at the same height as it was before transplanting.

PRUNING

The tops should be shortened in more or less, depending on the size, variety and condition of the trees.

On two-year or branched stock, thin out; do not keep more branches than you will ultimately need to form the skeleton of the tree. Four to six branches at the most is all that is required.

ORNAMENTALS

In our coast climate both evergreens and deciduous trees can be transplanted successfully during the winter months, that is from the end of October, when the leaves begin to fall, until April, when they start to bud again, but most deciduous trees and shrubs give best satisfaction when planted in the fall or at any rate when they are entirely dormant. On the other hand Conifers and Broadleaved Evergreens, which are shipped with a solid ball of soil adhering to the roots may be transplanted up to a much later date, in fact they will even transplant successfully when the buds have burst.

BALLED PLANTS

When plants come balled, stand in position in the hole just as the plant will remain, without removing the canvas, only cut open the string that is holding it together and the new roots soon work their way through the decaying canvas.

DECIDUOUS TREES and SHRUBS

The tops of deciduous trees and shrubs should be pruned in proportion to the amount of roots lost in transplanting. Their natural shape should be preserved as much as possible. The depth of the hole should permit the neck of the plant to be as near the surface of the ground as it was originally. Firm soil well around the roots and water thoroughly. Do not put manure among the roots when planting. A good mulch of manure or straw on the top of the ground around the plant will be beneficial.

All broken or bruised roots should be cut back with a sharp knife to good sound wood. In planting deciduous trees or shrubs with bare roots, the hole should be large enough to allow all the roots to be spread out to their full length and in their natural position.

AFTER CARE

Ornamentals as well as fruit trees certainly need cultivation, particularly the first year after planting, and this applies particularly to our dry climate during the summer months. Never allow weeds or grass to grow around the freshly planted trees. Neither should grain, potatoes or strawberries be planted at a closer distance than four to ten feet, according to the variety, as is often erroneously practised. Keep the hoe or cultivator going to maintain a dust mulch and thus preserve the winters moisture.

What Others Say:

From Ven. Archdeacon Dobie, Regina:

"Shipment No. 507 received this a.m. in good shape and are splendid specimens. Many thanks." April 25th, 1921.

From Colonel Bernard Scott, Dilkusha Ranche, Salmon Arm:

"The trees you recently sent me arrived in excellent condition and are evidently good stock." April 19th, 1921.

From Mr. W. C. Lundy, Salmon Arm, B.C.:

"The Duchess trees arrived in good shape and quality all that could be desired." April 21st, 1921.

From Mr. Basil A. Bradley, Salmon Arm, B.C.:

"I am very pleased indeed with the strength of these trees and they are the best the old-timers have seen around here for many years." April 23rd, 1921.

From Mrs. F. St. Kesber, Silverton, B.C.:

"I received my plants some time ago and in first class shape. If they do not grow it will be our fault, not yours. Many thanks indeed for the extras." June 19th, 1921.

From Mr. James Renwick, Vancouver, B.C.:

"The trees that I received from you a year ago are doing splendidly. You certainly can produce the goods." February 2nd, 1921.
